(54) Title: CRYSTALS AND STRUCTURE OF LUXS

(57) Abstract: The present invention provides crystalline LuxS, machine readable media embedded with the three-dimensional atomic structure coordinates of LuxS, and subsets thereof, and methods of using them.

## INTERNATIONAL SEARCH REPORT

Box I	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)			
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:				
1. X 6	Claims Nos.: $63-71$ because they relate to subject matter not required to be searched by this Authority, namely:			
<b>!</b>	see FURTHER INFORMATION sheet PCT/ISA/210			
ᆝ┈┕┚╻	Claims Nos.: 29-34, 42-44 secause they relate to parts of the International Application that do not comply with the prescribed requirements to such in extent that no meaningful international Search can be carried out, specifically:			
់ 	see FURTHER INFORMATION sheet PCT/ISA/210			
	Claims Nos.: ecause they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).			
Box II C	Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)			
This Intern	national Searching Authority found multiple inventions in this international application, as follows:			
	s all required additional search fees were timely paid by the applicant, this international Search Report covers all earchable claims.			
2. A	as all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment if any additional fee.			
	us only some of the required additional search fees were timely paid by the applicant, this International Search Report			
	overs only those claims for which fees were paid, specifically claims Nos.:			
<u></u>				
	to required additional search fees were timely paid by the applicant. Consequently, this International Search Report is estricted to the invention first mentioned in the claims; it is covered by claims Nos.:			
Remark o	n Protest The additional search fees were accompanied by the applicant's protest.			
	No protest accompanied the payment of additional search fees.			

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box I.1

Claims Nos.: 63-71

Concerning claims 63-71, applicant's attention is drawn to R. 39(v) PCT. The subject-matter of claims 63-71 refers only to presentation of structural information on a machine-readable medium and is not regarded as patentable invention within the meaning of Rule 39(v) PCT. Thus, the above mentioned claims will not be searched.

Continuation of Box I.2

Claims Nos.: 29-34, 42-44

Present claims 42-44 relate to a product "identified, designed or made according to the method of any of claims 1-41". Since none of the product has been disclosed in the application, the claims so lack support within the meaning of Art. 6 PCT, and the application so lacks disclosure within the meaning of Art. 5 PCT, that a meaningful search of said claims is impossible.

Present claims 29-34 relate to an extremely large number of possible methods. Due to the vague and unclear term "the binding pocket of LuxS protein or a binding pocket homolog" the claims contain so many options that a lack of clarity (and/or conciseness) within the meaning of Article 6 PCT arises to such an extent as to render a meaningful search of the claims impossible. Consequently, the search has been carried out for those parts of the application which do appear to be clear, namely claims 1, 14, 15 and 21.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
